

# KEGMAN KRONICLE

KEGMAN INC.

## KEGMAN WINS MSHA TELEMETRY UPGRADE PROJECT

MELBOURNE FL. Sept 10, 2012 Kegman Inc. has been awarded a contract with the U.S. Department of Labor, Mine Safety and Health Administration (MSHA) to modernize the seismic data telemetry system for their Trapped Miner Locating System. The MSHA Trapped Miner Locating System supports emergency response to mining accidents throughout the United States.

Kegman experts bring directly relevant experience and knowledge supporting system obsolescence and modernization of telemetry systems used for seismic data transport—on a global scale! We bring a highly qualified staff, well-experienced with geophysical, communication and electronic equipment!

## COMMUNITY CORNER

### Chamber of Commerce

Kegman joined the Cocoa Beach Chamber of Commerce and the Military Affairs Counsel (MAC) in August of 2012.

We joined the Cocoa Beach Chamber because of the exceptional support they provide our local military members.

We are excited to support MAC and local business.

### Space Coast Academies

We are working diligently to identify local businesses that would be willing to support job-shadowing and internship opportunities for Space Coast High students.

## SECURITY SOLUTIONS

### Monitoring Technology that Protects

Our monitoring service uses the most advanced communications technology available to monitor alarm systems around the clock. Our central station is highly fault-tolerant and engineered to rigorous standards that meet or exceed all industry requirements. We use two independent generators to back up all monitoring equipment in our reinforced, fire-resistant communication center. Even in the event of a total power failure, we continue to provide prompt responses to our customer's alarms.

### Cutting-Edge Technology

We use Manitou software from Bold Technologies, Ltd, which can help improve efficiency and improve response time. Manitou is compatible with Windows®-based applications and can automatically respond to assigned signals and alarms by sending e-mail messages, faxes and text messages. The software also allows us and our customers to generate reports that can be viewed online or with a personal digital assistant (PDA) or smartphone.
